

Dr. Ambrose Chan

Lecture title: Photonic-enhancing dentistry for optimal patient's oral care.

Why dental profession needs to continue to do more than our conventional dentistry? How advance in photonic technology can benefit conventional dentistry? What is the current scientific evidence? Clinical examples of how to integrate photonic-enhancing dentistry into our daily practice such as cariology, periodontology, implantology and endodontology etc.? In conclusion, photonic-enhancing dentistry can deliver an optimal patient's oral care, in our rapidly growing and aging global population.
